Using This Photoshop Keyboard Shortcuts Guide

Although the pictured keyboard above is a **Windows** keyboard, these Photoshop keyboard shortcuts will also work for **macOS**.

Simply make the following substitutions:

macOS	Windows
Command	Ctrl
Option	Alt
Delete	Backspace
Control	Right-Click
Return	Enter

Must-Know Photoshop Keyboard Shortcuts!

These simple commands are pretty easy to pull off and will undoubtedly speed up your productivity and workflow.

	macOS	Windows
Save As	Command Shift S	Ctrl Shift S
Save for Web	Command Shift Option S	Ctrl Shift Alt S
Undo	Command Z	Ctrl Z
Step Back	Command Option Z	Ctrl Alt Z
Duplicate	Command J	Ctrl J
Duplicate all visible Layers	Command Shift Option E	Ctrl Shift Alt E
Hide Extras	Command H	Ctrl H
Full-screen	F	F
Default Colors	D (black and white)	D (black and white)
Flip Foreground and Background colors	X	X
Hand tool while in another tool	Hold Spacebar	Hold Spacebar
Fill with Background color	Command Delete	Ctrl Backspace
Fill with Foreground color	Option Delete	Alt Backspace

Decrease/Increase Brush Size	[or]	[or]
Deselect	D	D
Restore Last Selection	Shift Command D	Ctrl D
Move tool while in painting tool	Hold Command	Hold D
Eyedropper while in any paint tool	Hold Option	Hold Alt
Cross-Hair Cursor on any painting tool	Caps Lock	Caps Lock
Lock transparent pixels	/ (backslash)	/ (backslash)
Commit edits when typing	Command Return	Ctrl Enter
Open the Fill dialog box	Shift Delete	Shift Backspace
Commit edits when typing	Command Return	Ctrl Enter

Number Pad Keyboard Shortcuts!

To quickly change the [opacity](#) of that layer, press any number on your keyboard.

This will work for both Windows and macOS.

Number Layer Opacity & Tool Opacity

1	10%
2	20%
3	30%
4	40%
5	50%
6	60%
7	70%
8	80%
9	90%
0	100%

	macOS	Windows
Do a combination of number keys for a specific percentage.	(i.e. 1 and 2 for 12% opacity)	(i.e. 1 and 2 for 12% opacity)
Flow	Shift + (combination of number keys)	Shift + (combination of number keys)
Fit To Screen	Command 0	Ctrl 0
Actual Pixels (100%)	Command 1	Ctrl 1
Load Channel as a selection	Option Command 3 (red) 4 (green) 5 (blue)	Alt Ctrl 3 (red) 4 (green) 5 (blue)

Arrow & “Other Keys” Keyboard Shortcuts!

You can find the Arrow & “other” keys between the “typewriter” keys and the numeric keypad. These Photoshop keyboard shortcuts are used primarily for moving objects or the screen to a different point.

When the Move tool is active, press any arrow keys to **move 1 pixel** in that direction. Hold Shift to **move 10 pixels** at a time.

If the Move tool is not active, hold Command (macOS) or Ctrl (Windows), tap on the arrow keys, and hold Shift to move 10 pixels simultaneously.

Move duplicate of selection 1 px: Command Option (macOS) or

Ctrl Alt (Windows) and any of the four arrow keys

Move duplicate of selection 10 px: Command Option Shift (macOS)

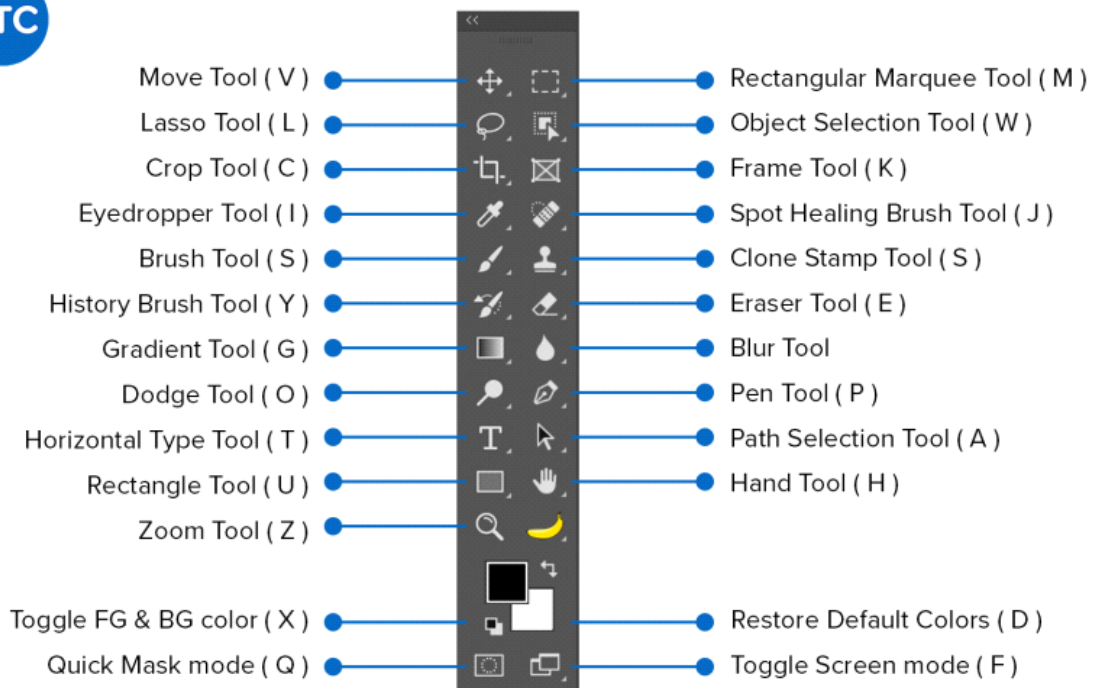

or Ctrl Alt Shift (Windows) and any of the four arrow keys

“Other” Keys:

	macOS	Windows
Move view to upper-left corner	Home	Home
Move view to lower-right corner	End	End
Scroll up 1 screen	Page Up	Page Up
Scroll down 1 screen	Page Down	Page Down
Scroll left 1 screen	Ctrl Page Up	Ctrl Page Up
Scroll right 1 screen	Ctrl Page Down	Ctrl Page Down

(Hold Shift in any of the four above to move by 10 units)
